#### Introduction

The National Skills Development Authority aims to enhance an individual's employability by certifying completeness with skills. NSDA works to expand the skilling capacity of identified public and private training providers qualitatively and quantitatively. It also aims to establish and operationalize a responsive skill ecosystem and delivery mechanism through a combination of well-defined set of mechanisms and necessary technical supports.

Key priority economic growth sectors identified by the government have been targeted by NSDA to improve current job skills along with existing workforce to ensure required skills to industry standards. Training providers are encouraged and supported to work with industry to address identified skills and knowledge to enable industry growth and increased employment through the provision of market responsive inclusive skills training program. "Welding" is selected as one of the priority occupations of Light Engineering Sector. This standard is developed to adopt a demand driven approach to training with effective inputs from ISC, employer associations and employers.

Generally, a competency standard informs curriculum, learning materials, assessment and certification of trainees enrolled in skills training. Trainees who successfully pass the assessment will receive a qualification in the NSQF and will be listed on the NSDA's online portal.

This competency standard is developed to improve skills and knowledge in accordance with the job roles, duties and tasks of the occupation and ensure that the required skills and knowledge are aligned to industry requirements. A series of stakeholder consultations, workshops were held to develop this document.

The document also details the format, sequencing, wording and layout of the Competency Standard for an occupation which is comprised of Units of Competence and its corresponding Elements.

A **competency standard** is a written specification of the knowledge, skills and attitudes required for the performance of an occupation, trade or job corresponding to the industry standard of performance required in the workplace.

The purpose of a competency standards is to:

- provide a consistent and reliable set of components for training, recognising and assessing people's skills, and may also have optional support materials
- enable industry recognised qualifications to be awarded through direct assessment of workplace competencies
- encourage the development and delivery of flexible training which suits individual and industry requirements
- encourage learning and assessment in a work-related environment which leads to verifiable workplace outcomes

Competency standards are developed by a working group comprised of representative from NSDA, Key Institutions, ISC, and industry experts to identify the competencies required of an occupation in **light Engineering sector**.

Competency standards describe the skills, knowledge and attitude needed to perform effectively in the workplace. CS acknowledge that people can achieve technical and vocational competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With competency standards, training and assessment may be conducted at the workplace or at training institute or any combination of these.

Competency standards consist of a number of units of competency. A unit of competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of competency are documented in a standard format that comprises of:

- unit title
- nominal duration
- unit code
- unit descriptor
- elements and performance criteria
- variables and range statement
- curricular content guide
- assessment evidence guide

Together, all the parts of a unit of competency:

- describe a work activity
- guide the assessor to determine whether the candidate is competent or not yet competent

The ensuing sections of this document comprise of a description of the relevant occupation, trade or job with all the key components of a unit of competency, including:

- a chart with an overview of all Units of Competency for the relevant occupation, trade or job including the Unit Codes and the Unit of Competency titles and corresponding Elements
- the Competency Standard that includes the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide and Assessment Evidence Guide.

# Competency Standards for National Skill Certificate – 03 in Welding

Level descriptors of NTVQF/ NSQF (BNQF 1-6)

Level & Job classification	Knowledge Domain	Skills Domain	Responsibility Domain
6-Mid-Level Manager/ Sub Assistant Engineer  Comprehensive actual and theoretical knowledge within a specific work or study area with an awareness of the validity and limits of that knowledge, able to analyze, compare, relate and evaluate		Specialised and wider range of cognitive and practical skills required to provide leadership in the development of creative solutions to defined problems. Communicate professional issues and solutions to the team and to external partners/users.	Work under broad guidance and self-motivation to execute strategic and operational plan/s. Lead lower-level management. Diagnose and resolve problems within and among work groups.
Broad knowledge of the underlying, concepts, principles, and processes in a specific work or study area, able to scrutinize and break information into parts by identifying motives or causes.		Broad range of cognitive and practical skills required to generate solutions to specific problems in one or more work or study areas. Communicate practice-related problems and possible solutions to external partners.	Work under guidance of management and self-direction to resolve specific issues. Lead and take responsibility for the work and actions of group/team members. Bridge between management.
Broader knowledge of the underlying, concepts, principles, and processes in a specific work or study area, able to solve problems to new situations by comparing and applying acquired knowledge.		A range of cognitive and practical skills required to accomplish tasks and solve problems by selecting and applying the full range of methods, tools, materials and information. Communicate using technical terminology and IT technology with partners and users as per workplace requirements.	Work under minimal supervision in specific contexts in response to workplace requirements. Resolve technical issues in response to workplace requirements and lead/guide a team/ group.
Moderately broad knowledge in a specific work or study area, able to perceive ideas and abstract from drawing and design according to workplace requirements.		Basic cognitive and practical skills required to use relevant information in order to carry out tasks and to solve routine problems using simple rules and tools. Communicate with his team and limited external partners upholding the values, nature and culture of the workplace	Work or study under supervision with considerable autonomy. Participate in teams and responsible for group coordination.
2-Semi Skilled Worker	Basic understanding of underpinning knowledge in a specific work or study area, able to interpret and apply common occupational terms and instructions.	Skills required to carry out simple tasks, communicate with his team in the workplace presenting and discussing results of his work with required clarity.	Work or study under supervision in a structured context with limited scope of manipulation
1 -Basic Skilled Worker  Elementary understanding of ability to interpret the underpinning knowledge in a specific study area, able to interpret common occupational terms and instructions.		Specific Basic skills required to carry out simple tasks. Interpret occupational terms and present the results of own work within guided work environment/ under supervision.	Work under direct supervision in a structured context with limited range of responsibilities.

#### List of Abbreviations

cs - Competency Standard

ISC - Industry Skills Council

FPS - Foot, Pound, Second

GMAW - Gas Metal Arc Welding

GTAW - Gas tungsten arc Welding

NSDA - National Skills Development Authority

MKS - Meter, Kilogram, Second

NSQF - National Qualifications Framework

OSH - Occupational Safety and Health

PPE - Personal Protective Equipment

SMAW - Shielded Metal Arc Welding

SS - Stainless Steel

SCVC - Standards and Curriculum Validation Committee

STP - Skills Training Provider

SOP - Standard Operating Procedure

UoC - Unit of Competency

#### **Accreditation Requirements**

Unit Code and Title	GU005L3V1: Carryout Workplace Interaction in English	
Nominal Hours	15 Hours	
Unit Descriptor	This unit covers the knowledge, skills and attitudes required to carry out workplace interaction.  It specifically includes – interpreting workplace communication and etiquette; reading and understand workplace documents; participating in workplace meetings	
	and discussions; and practicing professional ethics at workplace.	
Elements of Competency	Performance Criteria  Bold & Underlined terms are elaborated in the Range of Variables Training Components	
Interpret workplace communication and etiquette	<ul> <li>1.1 Workplace code of conducts are interpreted as per organizational guidelines</li> <li>1.2 Appropriate lines of communication are maintained with supervisors and colleagues</li> <li>1.3 Workplace interactions are conducted in a courteous manner to gather and convey information</li> <li>1.4 Questions about routine workplace procedures and matters are asked and responded as required</li> </ul>	
Interpret Workplace     Documents	<ul> <li>2.1 Workplace documents are interpreted as per standard.</li> <li>2.2 Assistance is taken to aid comprehension when required from peers / supervisors</li> <li>2.3 Visual information / symbols / signage's are understood and followed</li> <li>2.4 Specific and relevant information are accessed from appropriate sources</li> <li>2.5 Appropriate medium is used to transfer information and ideas</li> </ul>	
Participate in     workplace meetings     and discussions	<ul> <li>3.1 Team meetings are attended on time and followed meeting procedures and etiquette</li> <li>3.2 Own opinions are expressed and listened to those of others without interruption</li> <li>3.3 Inputs are provided consistent with the meeting purpose and interpreted and implemented meeting outcomes</li> </ul>	
Practice professional ethics at workplace	<ul> <li>4.1 Responsibilities as a team member are demonstrated and kept promises and commitments made to others</li> <li>4.2 Tasks are performed in accordance with workplace procedures</li> <li>4.3 Confidentiality is respected and maintained</li> </ul>	

	4.4 Situations and actions considered inappropriate or which present a conflict of interest are avoided
Range of Variables	
Variable	Range (may include but not limited to):
Courteous Manner	1.1 Effective questioning     1.2 Active listening     1.3 Speaking skills
Workplace Procedures     and Matters	<ul> <li>2.1 Notes</li> <li>2.2 Agenda</li> <li>2.3 Simple reports such as progress and incident reports</li> <li>2.4 Job sheets</li> <li>2.5 Operational manuals</li> <li>2.6 Brochures and promotional material</li> <li>2.7 Visual and graphic materials</li> <li>2.8 Standards</li> <li>2.9 OSH information</li> <li>2.10 Signs</li> </ul>
3. Appropriate Sources	3.1 HR Department 3.2 Managers 3.3 Supervisors
	thentic, valid, sufficient, reliable, consistent and recent and the current version of the Unit of Competency
Critical Aspects of     Competency	Assessment required evidence that the candidate:  1.1 followed workplace code of conducts is as per organizational guidelines  1.2 maintained workplace documents as per standard  1.3 followed workplace instructions and symbols  1.4 followed and implemented meeting outcomes
Underpinning     Knowledge	<ul><li>2.1 Workplace communication and etiquette</li><li>2.2 Workplace documents, signs and symbols</li><li>2.3 meeting procedure and etiquette</li></ul>
3. Underpinning Skills	<ul> <li>3.1 Interpreting performance of workplace communication and etiquette</li> <li>3.2 Interpreting workplace instructions and symbol</li> <li>3.3 Interpreting workplace code of conducts is as per organizational guidelines</li> <li>3.4 Interpreting workplace documents as per standard</li> <li>3.5 Interpreting and implementing meeting outcomes</li> </ul>

4. Underpinning Attitudes	<ul> <li>4.1 Commitment to occupational health and safety</li> <li>4.2 Promptness in carrying out activities</li> <li>4.3 Sincere and honest to duties</li> <li>4.4 Environmental concerns</li> <li>4.5 Eagerness to learn</li> <li>4.6 Tidiness and timeliness</li> </ul>
	<ul><li>4.6 Holness and timeliness</li><li>4.7 Respect for rights of peers and seniors in workplace</li><li>4.8 Communication with peers and seniors in workplace</li></ul>
5. Resource Implications	The following resources must be provided:  5.1 Relevant tools, Equipment, software and facilities needed to perform the activities.  5.2 Required learning materials.
6. Methods of Assessment	Methods of assessment may include but not limited to: 6.1 Written Test 6.2 Demonstration 6.3 Oral Questioning 6.4 Portfolio
7. Context of Assessment	<ul> <li>7.1 Competency assessment must be done in a NSDA accredited assessment centre</li> <li>7.2 Assessment should be done by an NSDA certified/nominated assessor</li> </ul>

**Occupation Specific Competencies** 

Unit Code and Title	OUWEL002L3V1: Perform SMAW on Pipes – 1G Position
Nominal Hours	10 Hours
Unit Descriptor	This unit covers the knowledge, skills and attitudes required to Perform SMAW on pipe –1G position.  It specifically includes the tasks of following OSH practices selecting tools, equipment and preparing materials, setting up welding machine, performing welding 1G position on pipe and cleaning and storing tools.
Elements of Competency	Performance Criteria  Bold and Underlined terms are elaborated in the Range of Variables.
Follow OSH practices	<ul> <li>1.1 PPE is selected and collected as per requirements</li> <li>1.2 PPE is worn as required</li> <li>1.3 Safe work practices followed as per workplace standard</li> </ul>
<ol> <li>Select tools, equipment and prepare materials</li> </ol>	<ul> <li>2.1 Weld requirements are identified from workplace instruction</li> <li>2.2 Tools, equipment, materials and electrodes selected and collected as per job requirements</li> <li>2.3 Plate surface are cleaned as per job specification</li> <li>2.4 Job is prepared as required</li> </ul>
Set up welding machine	<ul><li>3.1 Welding machine is prepared as per standard procedure</li><li>3.2 Ampere are set as per job requirements</li></ul>
4. Perform welding	<ul> <li>4.1. Tack welding is performed and alignment is checked as per job requirement</li> <li>4.2. Electrode's angle is maintained as per job requirement</li> <li>4.3. Key hole techniques are maintained during root pass as required</li> <li>4.4. Consecutive hot pass, filling pass and cover pass/reinforcement is performed as required</li> <li>4.5. Welds are cleaned as per job requirements</li> <li>4.6. Weld quality is checked visually and <u>defects</u> are identified and rectified as required</li> </ul>
5. Clean and store tools  Range of Variables	<ul> <li>5.1 Welding Machine shutdown are conducted</li> <li>5.2 Equipment and tools are cleaned and stored in accordance with workplace requirements</li> <li>5.3 The wastes are disposed and the workplace is cleaned in accordance with workplace requirements</li> </ul>

Variables	Range (may include but not limited to):
	1.1 Dust mask
	1.2 Safety glasses/Goggles
	1.3 Leather hand Gloves
	1.4 Ear plugs
	1.5 Air respirator
	1.6 Safety shoes/boots
	1.7 Aprons
<ol> <li>Personal Protective</li> </ol>	1.8 Face masks
Equipment	1.9 Overalls
	1.10 Welding helmet/Auto dark helmet
	1.11 Safety helmet
	1.12 Face shield
	1.13 Arm guard
	1.14 Leg guard
	1.15 Hand shield
	1.16 Safety belt
2. Tools	2.1 Jig and fixture/C-clamp
	2.2 Ball pin hammer
	2.3 Chipping hammer
	2.4 Tongs
	2.5 Flat file
	2.6 Weld gauge
	2.7 Wire brush
	2.8 Wire cup brush
	2.9 Angle Grinder
	2.10 Bevel protector
3. Equipment	3.1 Electrode oven
5. Equipment	3.2 AC welding machine
	3.3 DC welding machine
	3.4 Circular cutting machine
	3.5 Angle grinder machine
4. Materials	4.1 MS pipes wall thickness 10 - 12 mm (150 mm dia)
5. Electrodes	5.1 E6010(2.5 mm/12 SWG)
	5.2 E6011(2.5 mm/12 SWG)
	5.3 E6013(2.5 and 3.2 mm/12 and 10 SWG)
	5.4 E7016(2.6 and 3.2 mm/12 and 10 SWG)
	5.5 E7017(2.5 and 3.2 mm/12 and 10 SWG)
	5.6 E7018(2.5 and 3.2 mm/12 and 10 SWG)

6. Defects	1.1 Lack of fusion
	1.2 Lack of penetration
	1.3 Porosity
	1.4 Excess fusion
	1.5 Excess penetration
	1.6 Crack
	1.7 Slag inclusions
	1.8 Spatter
	1.9 Undercut
	1.10 Irregular shape and dimension
	1.11 Arc crater
	1.12 Pin hole
	1.13 Blow hole
	1.14 Over lap
	1.15 Distortion
	1.16 Undercut
	1.17 Arc crater
	1.18 Poor bead appearance

#### **Evidence Guide**

The evidence must be authentic, valid, sufficient, reliable, consistent and recent and meet the requirements of the current version of the Unit of Competency.

Critical aspects of	1.1 Set up equipment	
	1.2 Adjusted ampere	
	1.3 Selected appropriate electrode angle	
competency	1.4 Maintained travel speed	
	1.5 Maintained key hole techniques	
	1.6 Performed welding	
	2.1 Edge preparation	
	2.1.1 Bevel angle	
	2.1.2 Root face	
	2.2 Root gap	
	2.3 Tack weld	
	2.4 Welding passes	
2. Underpinning	2.5 Reinforcement	
knowledge	2.6 Electrodes	
Kilowiedge	2.7 Welding current	
	2.8 Electrode angles	
	2.9 Arc length	
	2.10 Travel speed	
	2.11 Causes and rectification of welding defects	
	2.12 Destructive test	
	2.13 Non-Destructive test	

3. Underpinning Skills	3.1	Following OSH
	3.2	Interpreting drawings and specification
	3.3	Handling hand tools and equipment
	3.4	Adjusting welding machine
	3.5	Communicating in the workplace
	3.6	Maintaining welding process and procedures
	4.1	Commitment to occupational health and safety
. 11-1	4.2	Environmental concerns
4. Underpinning	4.3	Eagerness to learn
attitudes	4.4	Tidiness and timeliness
	4.5	Respect for rights of peers and seniors in workplace
	The	following resources must be provided:
	5.1	Workplace
	5.2	Tools, equipment and facilities appropriate to
o Deserves insulications		processes or activity
6. Resource implications	5.3	Materials relevant to the proposed activity
	5.4	Relevant drawings, manuals, codes, standards and
		reference material
	5.5	Standby firefighting system
	6.1	Demonstration
7. Methods of	6.2	Oral questioning
assessment	6.3	Written test
	6.4	Portfolio
	7.1	Competency assessment must be done in NSDA
9. Context of		accredited assessment centre
assessment	7.2	Assessment should be done by a NSDA
		certified/nominated assessor

Unit Code and Title	OUW	VEL002L3V1: Perform SMAW on Pipes – 2G Position
Nominal Hours	20 H	ours
	1	unit covers the knowledge, skills and attitudes required of orm SMAW on pipes – 2G position
Unit Descriptor	selec weldi	ecifically includes the tasks of following OSH practices, cting tools, equipment and preparing materials, setting up ing machine, performing welding 2G position on pipe, ning and storing tools.
F1	Perf	ormance Criteria
Elements of	Bold	and Underlined terms are elaborated in the Range of
Competency	Varia	bles.
1. Follow OSH	1.1	PPE is selected and collected as per requirements.
practices	1.2	PPE is worn as required
	1.3	Safe work practices followed as per workplace standard
2. Select tools,	2.1	Weld requirements are identified from workplace
equipment and		instruction
prepare materials	2.2	Tools, equipment, materials and electrodes are
		selected and collected as per job requirements
	2.3	Plate surface are cleaned as per job specification
	2.4	Job is prepared as required
3. Set up welding	3.1	Welding machine is prepared as per standard
machine		procedure
	3.2	Ampere are set as per job requirements
4. Perform welding	4.1	Tack welding is performed and alignment is checked as per job requirement
	4.2	Electrode's angle is maintained as per job requirement
	4.3	Key hole techniques are maintained during root pass as required
	4.4	Consecutive hot pass, filling pass and cover
		pass/reinforcement is performed as required
	4.5	Welds are cleaned as per job requirements
	4.6	Weld quality is checked visually and <u>defects</u> are identified and rectified as required
5. Clean and store tools	5.1	Welding Machine shutdown are conducted
o. Stouri and store tools	5.2	Equipment and tools are cleaned and stored in
		accordance with workplace requirements
	5.3	The wastes are disposed and the workplace is cleaned
	0.0	in accordance with workplace requirements

#### **Evidence Guide**

The evidence must be authentic, valid, sufficient, reliable and consistent to meet the requirements of the current version of the unit of competency.

Critical aspects of competency	1.1 Following OSH
	1.2 Set up equipment
	1.3 Adjusted ampere
	1.4 Selected appropriate electrode angle
	1.5 Maintained travel speed
	1.6 Maintained key hole techniques
	1.7 Performed welding
	2.1. Edge preparation
	2.1.1.Bevel angle
	2.1.2.Root face
	2.2. Root gap
	2.3. Tack weld
	2.4. Welding passes
2 Underninging	2.5. Reinforcement
2. Underpinning	2.6. Electrodes
knowledge	2.7. Welding current
	2.8. Electrode angles
	2.9. Arc length
	2.10. Travel speed
	2.11. Causes and rectification of welding defects
	2.12. Destructive test
	2.13. Nondestructive test

<ol><li>Underpinning Skills</li></ol>	3.1. Following OSH
	3.2. Interpreting drawings and specification
	3.3. Handling hand tools and equipment
	3.4. Adjusting welding machine
	3.5. Communicating in the workplace
	3.6. Maintaining welding process and procedures
	4.1. Commitment to occupational health and safety
	4.2. Environmental concerns
4. Underpinning	4.3. Eagerness to learn
attitudes	4.4. Tidiness and timeliness
	4.5. Respect for rights of peers and seniors in workplace
	The following resources must be provided:
	5.1 Workplace
	5.2 Tools, equipment and facilities appropriate to
5. Resource	processes or activity.
implications	5.3 Materials relevant to the proposed activity.
	5.4 Relevant drawings, manuals, codes, standards and
	reference material.
	5.5 Standby firefighting system
	6.1. Workplace observation
	6.2. Demonstration
6. Methods of	6.3. Oral questioning

7. Context of	accredited assessment centre
assessment	7.2. Assessment should be done by a NSDA
	certified/nominated assessor

Unit Code and Title	OUWEL003L3V1: Perform SMAW on Pipes – 5G Position
Nominal Hours	40 Hours
	This unit covers the knowledge, skills and attitudes required to perform SMAW on pipes – 5G Position
Unit Descriptor	It specifically includes the tasks of It specifically includes the tasks of following OSH practices, selecting tools, equipment and preparing materials, setting up welding machine, performing welding 5G position on pipe and cleaning and storing tools.
F1	Performance Criteria
Elements of Competency	<b>Bold and Underlined</b> terms are elaborated in the Range of Variables.
1. Follow OSH practices	1.1 PPE is selected and collected as per requirements
Tollow Golf products	1.2 PPE is worn as required
	1.3 Safe work practices followed as per workplace
	standard
2. Select tools,	2.1 Weld requirements are identified from workplace
equipment and	instruction
prepare materials	2.2 Tools, equipment, materials and electrodes are
	selected and collected as per job requirements
	2.3 Pipes are cleaned as per job specification
	2.4 Job is prepared as required
<ol><li>Set up welding</li></ol>	3.1 Welding machine is prepared as per standard
machine	procedure
	3.2 Ampere are set as per job requirements
Perform welding	4.1 Tack welding is performed and alignment is checked as per job requirement
	4.2 Electrode's angle is maintained as per job requirement
	4.3 Key hole techniques are maintained during root pass as required
	4.4 Consecutive hot pass, filling pass and cover
	pass/reinforcement is performed as required
	4.5 Welds are cleaned as per job requirements
	4.6 Weld quality is checked visually and <u>defects</u> are identified and rectified as required
5. Clean and store tools	5.1 Welding Machine shutdown are conducted
	5.2 Equipment and tools are cleaned and stored in
	accordance with workplace requirements

	5.3 The wastes are disposed and the workplace is cleaned in accordance with workplace requirements
Range of Variables	in accordance with weithhard requirements
Variable	Range (may include but not limited to):
	1.1 Dust mask

#### **Evidence Guide**

The evidence must be authentic, valid, sufficient, reliable, consistent and recent and meet the requirements of the current version of the Unit of Competency.

	1.1. Followed OSH	
Critical aspects of competency	1.2. Set up equipment	
	1.3. Adjusted ampere	
	1.4. Performed welding	
	1.5. Checked and rectified welding defects	
	2.1. Define GMAW	
	2.2. GMAW wire	
	2.3. Welding current	
O. Hadaminaina	2.4. Arc length	
2. Underpinning	2.5. Functions of regulator	
knowledge	2.6. Shielding gas	
	2.7. Causes and rectification of welding defects	
	2.8. Destructive test	
	2.9. Non-destructive test	
O. Hadaminaina okillo	3.1. Selecting PPE	
<ol><li>Underpinning skills</li></ol>	3.2. Selecting drawings and specification	

	3.3. Handling hand tools and equipment
	3.4. Adjusting welding machine
	3.5. Following welding procedure and system
	4.1. Commitment to occupational health and safety
	4.2. Environmental concerns
4. Underpinning	4.3. Eagerness to learn
attitudes	4.4. Tidiness and timeliness
	4.5. Respect for rights of peers and seniors in workplace Respect for
	rights of peers and seniors in workplace.
	The following resources must be provided:
	5.1. Workplace
5. Resource	5.2. Tools, equipment, GMAW guide line and facilities appropriate to
implications	processes or activity.
	5.3. Materials relevant to the proposed activity
	6.1. Demonstration
6. Methods of	6.2. Oral questioning
assessment	6.3. Written test
	6.4. Portfolio
	7.1. Competency assessment must be done in NSDA accredited
<ol><li>Context of</li></ol>	assessment centre
assessment	7.2. Assessment should be done by a NSDA certified/nominated assessor

## **Development of Competency Standard**

The Competency Standards for National Skills Certificate in **Welding** Standard is developed by NSDA on 14-21 March, 2021.

This Competency Standard for Welding is a document for the development of

curricula, teaching and learning materials, and assessment tools. It also serves as the

document for providing training consistent with the requirements of industry in order

for individuals who graduated through the established standard via competency-based

assessment to be suitably qualified for a relevant job.

This document is owned by the NSDA of the People's Republic of Bangladesh,

developed in association with Light Engineering Industry Skills Council.

Public and private institutions may use the information contained in this standard for

activities benefitting Bangladesh.

Other interested parties must obtain permission from the owner of this document for

reproduction of information in any manner, in whole or in part, of this Competency

Standard, in English or other language.
